

Company presentation

- **Technology Solutions in Measure,**
- **Management, Automation,**
- **Protection and Control.**

● our mission

- We offer **products and technological solutions** that guarantee profitability and safety, backed by leading and recognized brands in the market.

We specialize in different areas:

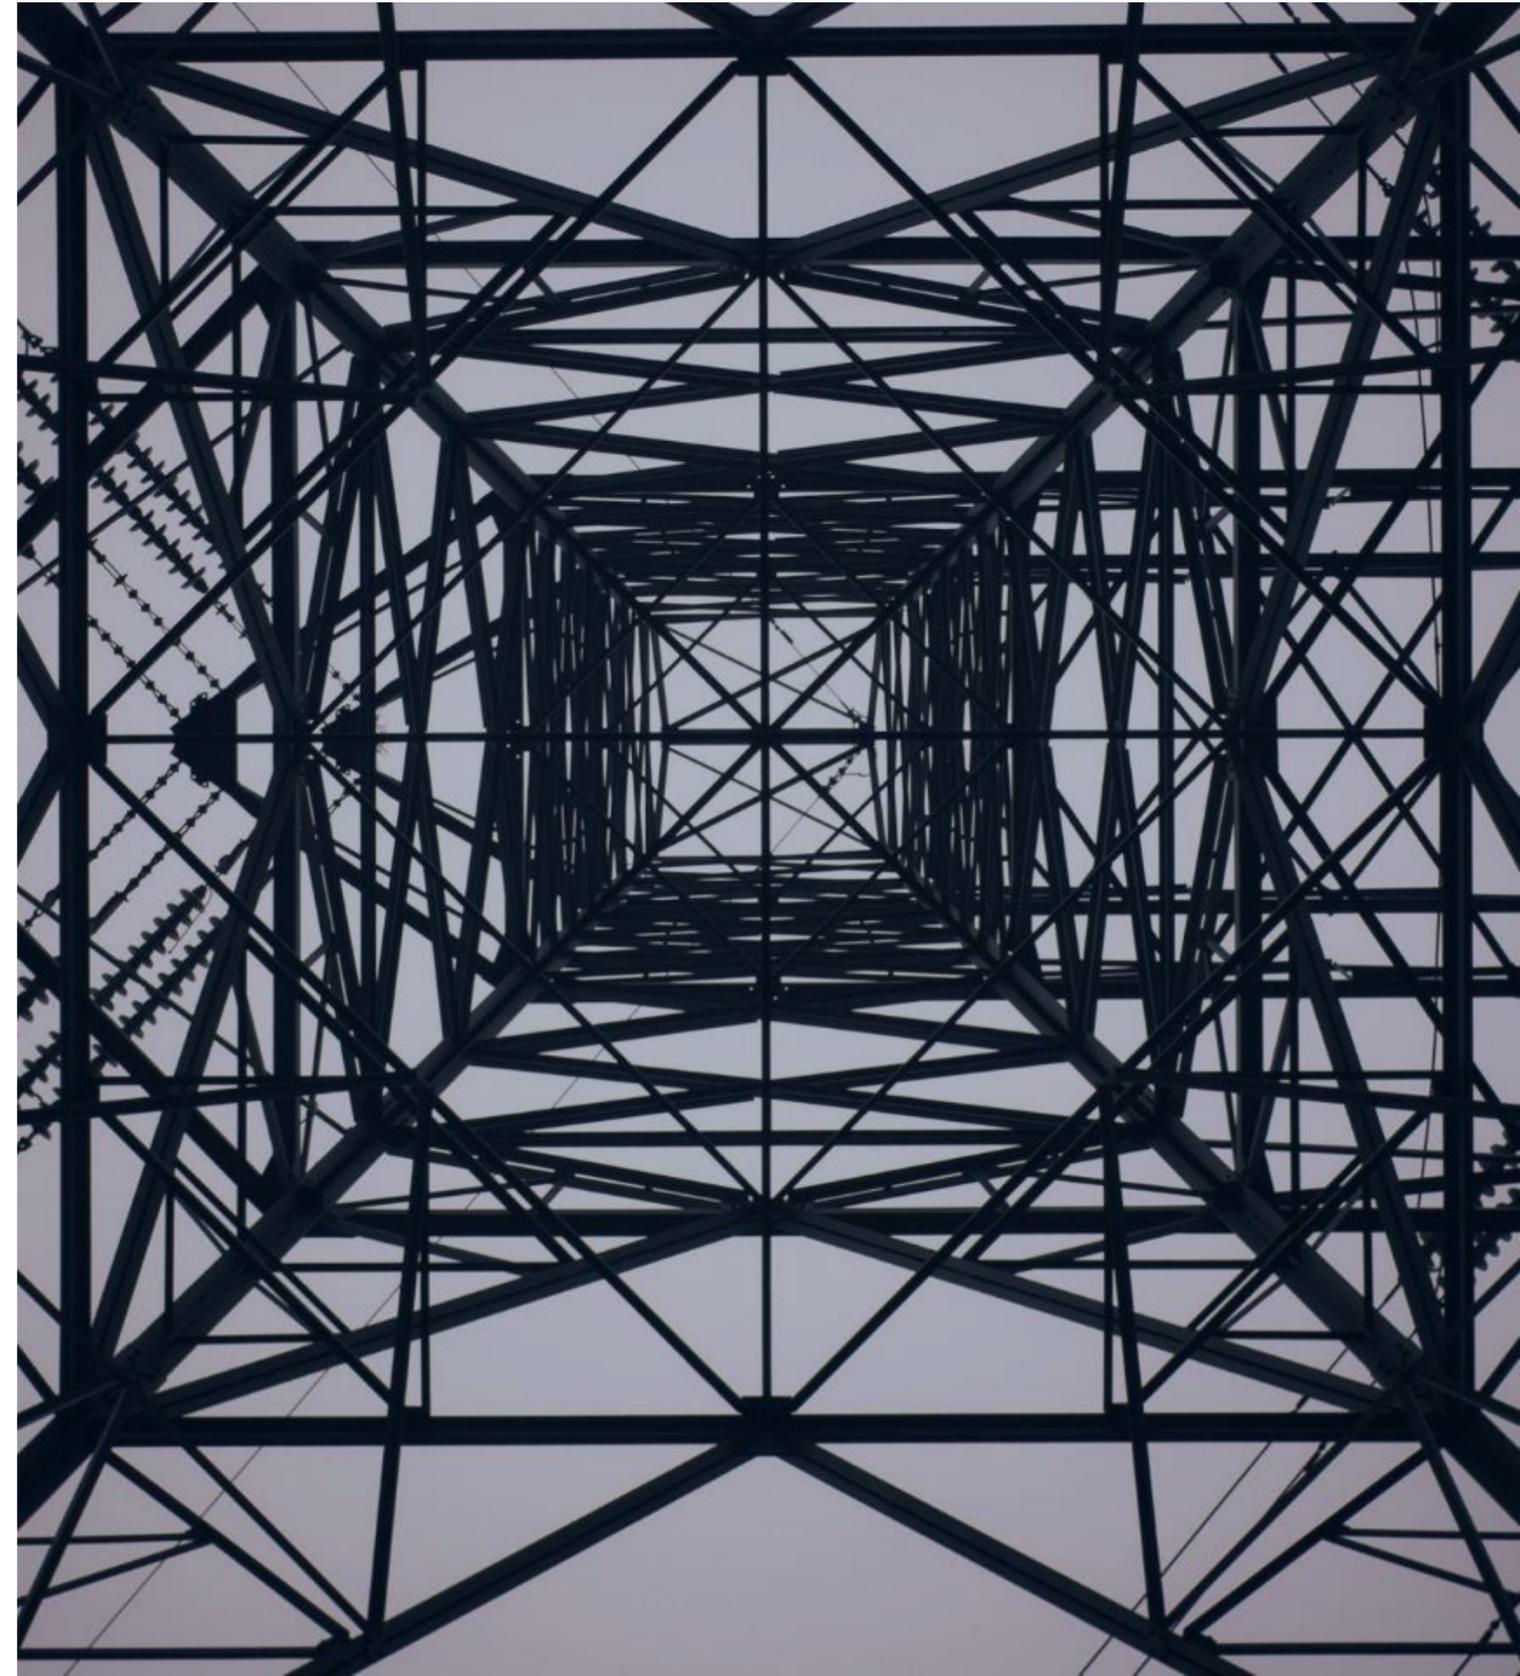

- **New energies.**
- **Power generation and distribution.**
- **Data Center.**
- **Railway.**
- **Telecommunications.**
- **Industrial automation.**

● objectives

- Offer **Professional Technology Solutions** in various sectors and applications.

On going support throughout the entire process, from the **Prescription and pre-sale**, to the support in **integration and commissioning**.

Renew and **innovate** our catalogue with new technologies.

● evolution and growth

● 2006 Beginning

First headquarters in the city of Madrid.

● 2008 Positioning

The technical support department is created.

● 2009 New challenges

Storage and distribution capacity is expanded

● 2010 Regulatory certification ISO 9001

Maximum quality and service as an ISO 9001 company.

● 2012 Diversification

Development of our own products to respond to specific needs.

Nader
2021 New Partner
LAZZEN by Nader

● 2022 Regulatory certification ISO 27001

● 2024

● our core values

Professional Advice

Technical support

Safety

Innovation

Exclusive brands

providing specialized solutions

What does Enertronic offer its customers?

Technical and commercial support from prescription to commissioning. In this way, we provide our clients with security and stability in all phases of the Project.

Enertronic Service Repair

We have the company **IDAS SOLUTIONS** within the Enertronic Group to offer a specialized service in the repair of industrial electronic equipment.

- **Nader After Sales Service**
- **Official Delta y Mitsubishi Technical Service.**
- Repair of servo motors and special motors.
- Supply of discontinued equipment.
- Industrial electronics repair.
- On-site technical assistance.

Enertronic and its international partners

We are a specialized organization that works in a coordinated and active way in the specification and sale of "state of the art" technological solutions.

certifications

ISO 50001 Standard Certification

We are a provider of solutions and technologies to implement energy management systems according to ISO 50001.

ISO 9001 Standard Certification

Maximum quality and service as an ISO 9001 company.

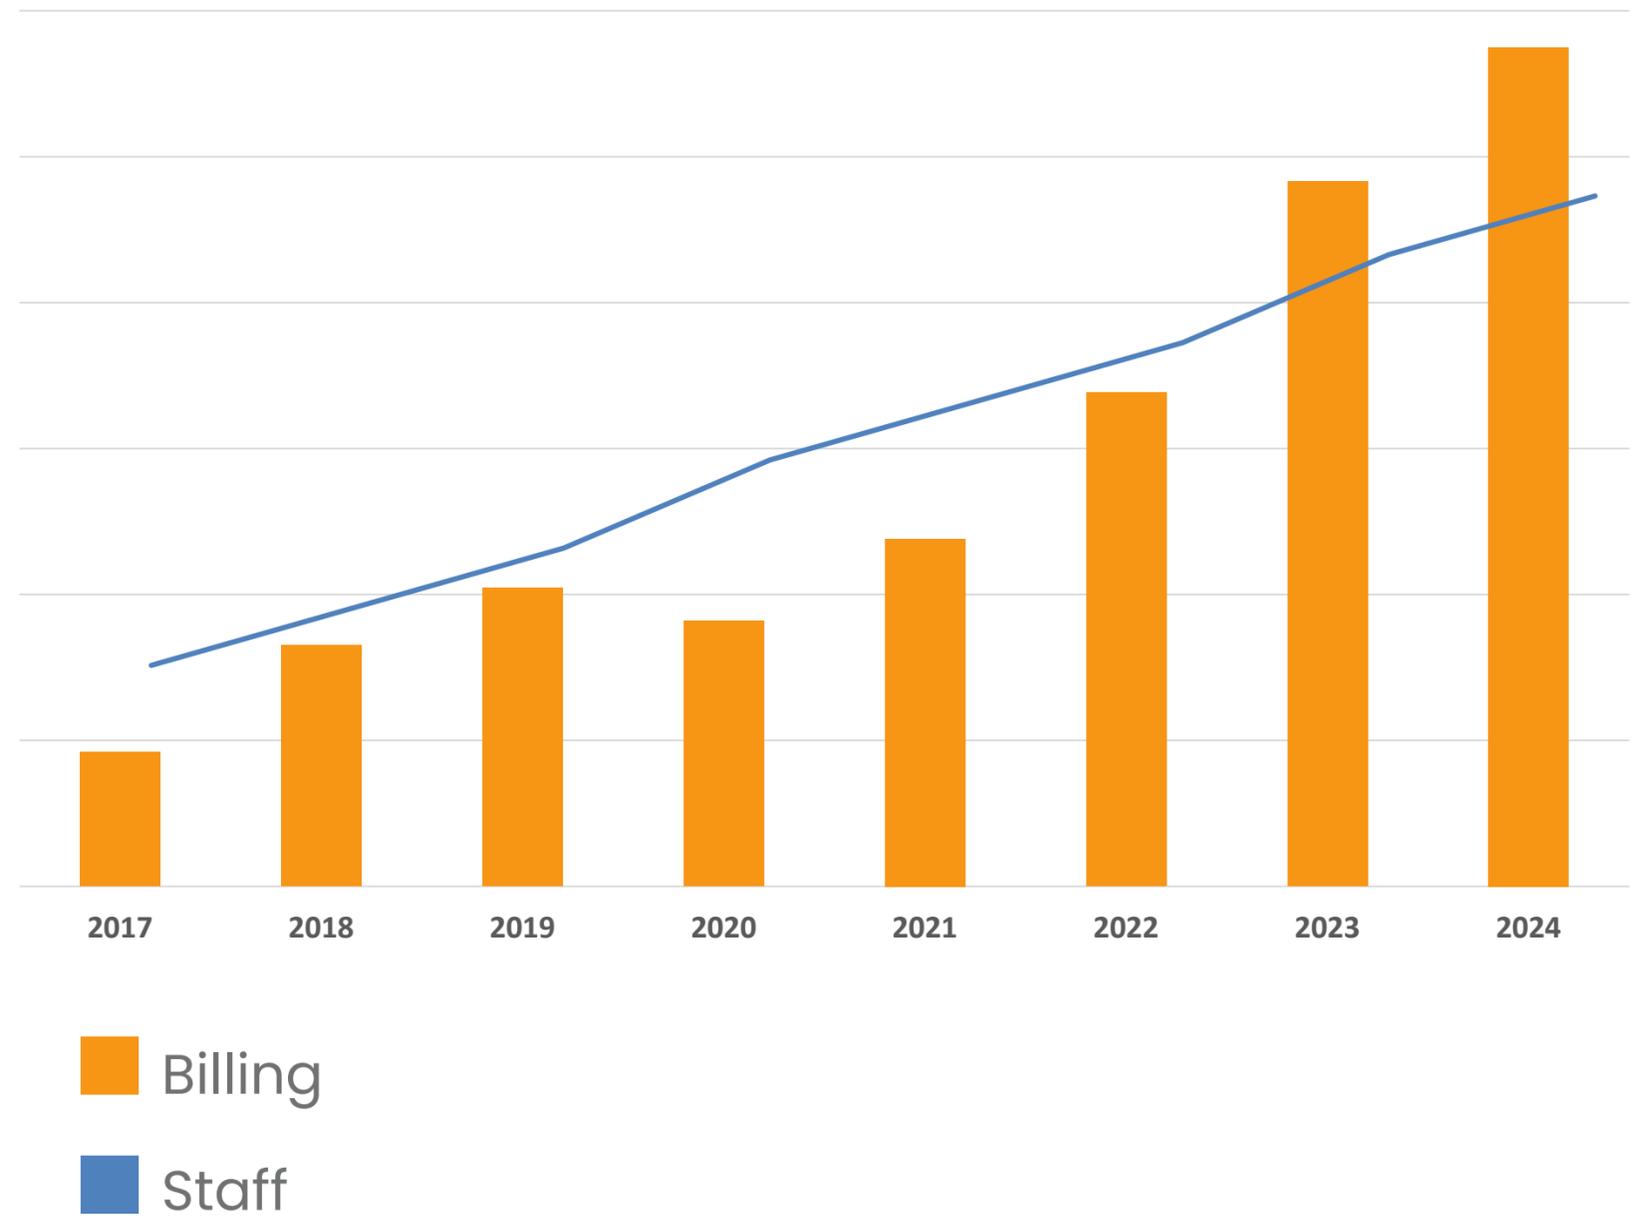

ISO 27001 Standard Certification

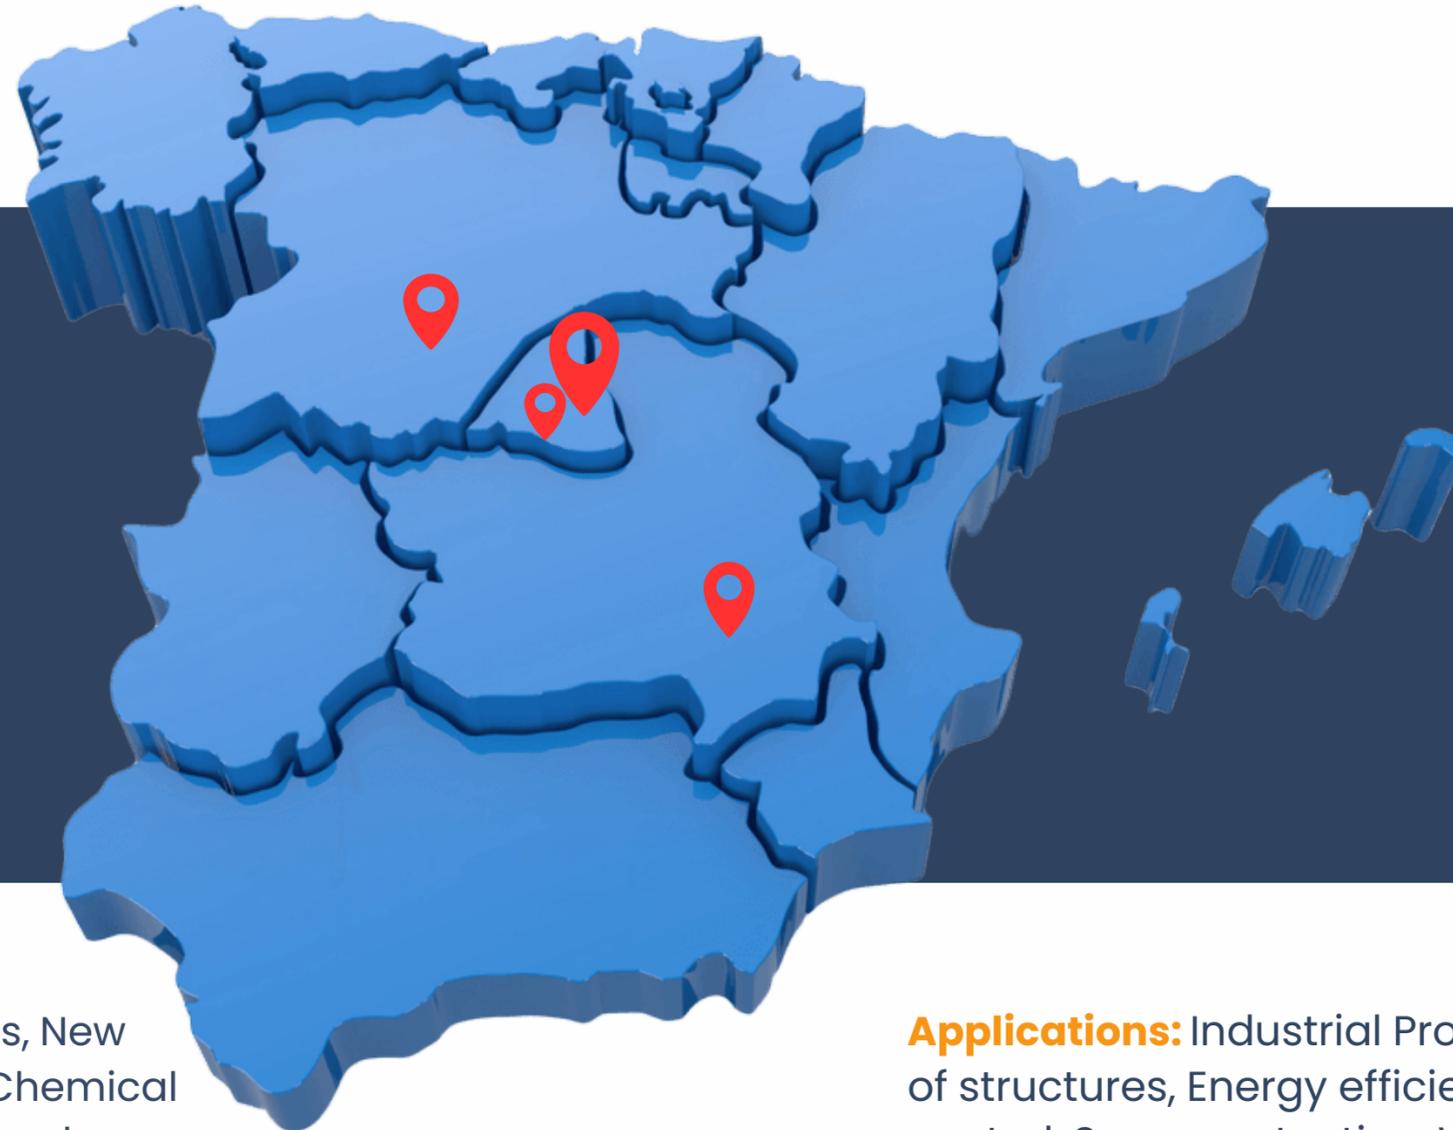

Our company is ISO 27001 certified, ensuring high standards of information security.

"True progress is the one that makes technology available to everyone."

Henry Ford (1863-1947)
American industrialist.

● Market presence

Sectors: Industry, Telecommunications, New Energies, Traffic and Railways, Naval, Chemical & Petrochemical, Commercial Sector and tertiary, DPC Data processing centers, Power generation and distribution...

Applications: Industrial Processes, Aeronautical beaconing of structures, Energy efficiency, Photovoltaics, Industrial control, Surge protection, Wind generation, Cogeneration, Energy management, Motor control, Drives, Home automation, Building automation...

Enertronic SA employs professionals specialized in each sector and application, product managers and three defined departments: commercial, technical and operational.

exclusive distributors in Spain

official distributors

Citel focuses its activity and expertise on protecting networks and equipment against transient overvoltages.

It developed a patented technology that combines high-energy varistors with gas discharge tubes, achieving greater robustness, reliability, and end-of-life performance.

It offers Type I, II, and III protections for low voltage, photovoltaic, wind power, computer networks, radiofrequency, LED lighting, telephony, CCTV, and gas discharge tubes.

FUSES

Fuses and fuse holders for PV and EV applications.

Adler Elektrotechnik Leipzig GMBH is one of the most technologically advanced fuse manufacturers, offering specific solutions (specializing in DC) for the following sectors: **photovoltaic, electric vehicles (EV and EVSE), and industrial.**

- Fuses for PV.
- Fuses for EV.
- Fuses for BESS.

Enertronic, as **Adler's exclusive distributor**, offers the full range of fuse protection solutions, from fuse bases to inline fuses.

Solutions for measurement and analysis of electrical energy.

Satec is a global leader with over four decades of experience in the research, development, and manufacturing of energy monitoring solutions.

Satec's product range spans from basic energy analyzers to high-end network analyzers with advanced capabilities for supply quality analysis and substation automation.

MERZ in Spain offers a complete range of load-break switches, including the possibility of implementing custom switch solutions for specific applications.

It also provides Cam Switch solutions:

- Load-break switches.
- Load-break switches with Cam Switch technology.
- Safety switches.
- Star-delta changeover switches.
- EMV switches.
- Aluminum switches and changeovers.
- Lockable switches.
- Switch accessories and signaling.
